

Fusion® Omnidirectional Laser Scanner

The Fusion® is a lightweight and ergonomic hand-held scanner capable of omnidirectional and single-line bar code scanning. An adjustable stand with three locking positions provides flexibility to position the scanner for individual comfort and optimal hands-free performance, making it ideal for churches with busy check-in stations and schools or child care facilities that mark attendance. Also, the stabilized weighted metal base may be hard-mounted to counters and walls. Plus, there are no software drivers to load - just plug and play!

Standard features such as Flash ROM, MetroSelect® and MetroSet2® programming, and user replaceable cables protect your investment by enabling the Fusion® omnidirectional scanner to grow with you and your needs.

Key Features:

- Scan bar codes in any orientation
- Push button targeted single-line scanning option
- Hands-free operation, reducing operator fatigue
- Multiple sleep modes with IR (infra-red) wake up
- Mountable stand with three locking positions
- User configurable depth of field
- Easy bar code configuration
- 7 beeper tones

**This scanner is not to be used for the purpose of taking inventory in Fixed Assets.*
