

# Facility Scheduler Release Notes - October 2012

Leaves are turning colors, fall is in full swing and, believe it or not, holidays are creeping up just around the corner! Facility Scheduler has a reason to celebrate, too. We're pleased to announce a brand new release with many requested enhancements and corrections.

---

## Enhancements

1

### New Save Prompt

✓ If you close the window while you are adding or editing an event, Facility Scheduler will prompt you to save your changes. 

2

### Canceled Occurrences

✓ When you cancel a published occurrence of an event, a new prompt will ask if you want to remove the published setting. If you leave the occurrence published, it will remain visible on the calendar as a canceled event. You will hide the occurrence on the calendar if you choose to remove the published setting.

✓ You can now change the **Published** status of a canceled occurrence. This allows you edit a canceled occurrence and hide it on the calendar at a later time.

Event Details

Name:

Calendar:  Children's Ministry

Additional Calendars: Church Wide, Local Community... [View More](#)

Status:  Canceled  **Published**

### 3 Show All Locations on the Monthly Calendar Report

✓ The **Monthly Calendar** report now provides a **Show All Locations** option. You can also continue to select **Show Primary Location** as needed. ❤️

Use Advanced Query: [Select a query]

Pending Events     Approved Events     Show Primary Location

Confirmed Events     Canceled Events     **Show All Locations**

### 4 Setup and Teardown Times

✓ When you enter a setup and/or teardown time manually, and then add one or more resources to the event, one of the following happens: ❤️

- If the total time of the resources is **less** than the manually entered time, no changes are made.
- If the total time of the resources is **greater** than the manually entered time, the manually entered time changes to match the resource time.

## Corrections

Summary	Status
On the Monthly Calendar Report, if two events on the same day have the same primary location, only one event displays the location. ❤️	Resolved
Facility Scheduler does not properly place events in order when sorting advanced queries by start time. The sorting will now take into account whether a start time is listed as AM or PM. ❤️	Resolved

Restricted resources are available to all users during event creation. This causes the event creation to fail when a user who does not have proper permissions attempts to book the restricted resource as part of the event. 	Resolved
When printing a report using the 3x5 card option, the event description and notes do not print.	Resolved
