

Exciting changes are here for background checks!

Background Check Changes Banner

Introducing a new way to do background checks

In today's world, it's important to know exactly who is volunteering, serving, working, and caring for your church or school family. That's why we've partnered with Verified First to bring you comprehensive, detailed, and convenient background checks. [Learn more about our background check packages.](#)

Before processing background checks, you'll need to update your [ACS](#) or [HeadMaster](#) software to the latest version and sign up for a VerifiedFirst account.

About the changes

Verified First offers time-saving, secure, features such as

- A secure online application.
- Additional controls over staff rights.
- Consolidated billing that lets you pay one bill, not two.

The features you loved aren't going away. You can still submit, access, and review background checks within your product and link screening costs to accounting. You can read more about these changes in the [ACS People Suite](#) and [HeadMaster](#) release notes.

Still have questions?

We'd love to talk. Contact ACS Technologies Support or email backgroundchecks@acst.com.
