

"Dbisam engine error #11949 sql parsing error--expected column name" displays when previewing the alumni report

When trying to preview or print the Alumni Report in HeadMaster, this error displays

```
Dbisam engine error #11949 sql parsing error--expected column name, but instead found field 1 in select sql statement at line 3, column 3
```

Products Affected: HeadMaster (All)

Versions Affected: 11.5.1.5

To resolve this, perform a manual backup, then contact HeadMaster Support.
