

Get an Event by Event ID

GET `/:site_number/events/:event_id`

Returns detailed information about the event identified by the EventId supplied in the URL.

Example

```
https://secure.accesssacs.com/api_accesssacs_mobile/v2/12345/events/123
```

Required Permissions

The user must fall into one of the categories below:

- System Administration
- A user with Full/View rights to the calendar event

Request Header

Basic Authorization is used to determine security rights for the user credentials supplied using the following parameters.

username: "jadams"

password: "password231"

URL Parameters

site_number – The site number to gather data for.

event_id – The ID of the event to be retrieved. Value from [Facility Scheduler Get List of Events API](#).

- For Recurring events, StartDate and StopDate can be any date in the series. For Non-Recurring events, these will be correct as well as events that are no longer part of the series.
- The CalendarName and CalendarID only reflect the primary calendar.
